

STONEPEAK PRESENTS

FACTORY TOUR: THE FUTURE OF TILE

Tour the state-of-the-art, eco-friendly StonePeak Ceramics factory in Crossville, Tennessee. The tour walks participants through the entire life-cycle of a piece of tile, from raw material to firing. Participants also see the innovative equipment that produces the company's revolutionary 120" x 60" large gauged tiles. Following the tour, participants enjoy lunch while engaging in a question and answer session about the factory and StonePeak products.

LEARNING OBJECTIVES:

Participants will:

- Understand the production process of porcelain tile
- Observe the eco-friendly nature of the factory and the production process
- Learn about the technical characteristics of porcelain tile
- Consider various applications of large gauged porcelain tile

PROVIDER/COURSE NUMBER: AIA: J842/SPCTOUR; IDCEC: CEU-104575

LENGTH/CREDIT: AIA: 2.0 LU/HSW; IDCEC: 0.2 CEU

FORMAT:

Walking tour of the Crossville, Tennessee manufacturing facility followed by a "lunch and learn" seminar. Lunch provided.

COST:

Free

FACILITATOR QUALIFICATIONS:

Facilitators are considered experts in the tile industry. They are also trained presenters.

TARGET AUDIENCE:

Anyone interested in learning more about tile manufacturing, such as architects, specifiers and other design professionals. This program meets every experience level and includes a question and answer session to address specific interests.
